“My professors, my fellow students, the Computer Science Advisory Board, and the executives that I had access to while at Marist have pushed my career to a place that I wouldn’t have thought was possible just a few years ago. In fact, I don’t think I’d be with Goldman Sachs right now, working on innovative software, without everything Marist had to offer.”

“I would not be here today without the support and encouragement of the Marist community. My experience at Marist, inside and outside of the classroom, helped shape the direction of my career. Still to this day, I lean on the Marist community – whether it be the professors who double as mentors, or my classmates who now serve as my colleagues.”

“Having had the opportunity to study abroad definitely helps me in my job, because it opened my eyes to a way of life that was not American. When you’re dealing with customers in other countries ... it’s very helpful to be aware of and sensitive to other cultures. ... There are plenty of networking opportunities at Marist – in fact, a fellow English Literature alum helped me get my current job.”

“The small class size and tight-knit community at Marist allowed me to build close relationships with professors. These mentorships allowed me to assist with and conduct research as well as attend conferences and author manuscripts. More importantly though, they allowed me to get the advice and wisdom that I needed to find the right focus and path in graduate study.”

Grants for Advanced Study

Marist College students have experienced increasing success in their applications for nationally competitive scholarships

The College is recognized as a top producer of Fulbright Grant recipients

Over the past eleven years, fourteen Marist students have received Fulbright U.S. Student Program Grants to spend nine to eleven months abroad following graduation, either pursuing research or teaching English in another country. This year, Marist was recognized as a "Fulbright U.S. Student Grant Top Producer" by the Institute of International Education. This recognition singles out U.S. institutions of higher education which have produced the greatest number of Fulbright Student Grant recipients in a given competition cycle. The distinction is published annually in *The Chronicle of Higher Education*.

Distinguished awards help to promote study of Science, Teaching, Study Abroad

Since 2006, four Marist students have been named Barry M. Goldwater Scholars for their undergraduate promise in scientific research, and two students have received the National Science Foundation (NSF) Graduate Research Fellowship for doctoral study in the sciences. In 2008, a senior was

awarded the James Madison Memorial Fellowship, which supports the graduate studies of future secondary school teachers of U.S. History or government; she was the sole recipient of that award in New York State. Since 2004, ten students have received the Benjamin Gilman Scholarship, funding their undergraduate studies abroad. For the summer of 2014, a Marist sophomore was awarded the highly competitive U.S./U.K. Fulbright Summer Institute Grant, in his case for the four-week summer institute at the University of Bristol.

Trend continues: eight Marist finalists for this year's Fulbright and Truman Awards

Scholarship good news continues to take center stage at Marist this year. Seven students have advanced to finalist status in this year's Fulbright competition. Further, a Marist junior has been named a finalist in the extremely demanding competition for the Harry S. Truman Scholarship, which provides networking opportunities along with support for the graduate studies of future U.S. public policy "change agents."
