Connecting to FoxNet

Windows 8:

Click on the wireless icon in the bottom right of the screen to bring up available networks. Connect to “FoxNet”

Enter your Marist username and password.
Windows will notify you that it can’t verify the server’s identity. It is safe to click connect.

Your credentials will be verified.
Once connected to FoxNet, open your web browser to be redirected to the following webpage where you must read and agree to Marist’s acceptable use policy:

![Acceptable Use Policy](image1.png)

After reading and accepting the acceptable use policy your computer is ready to use the network. You should be able to browse to wherever you want to go. If you cannot get anywhere, try turning your wireless off and back on again, or try rebooting your computer.
