CMPT 130L758
Information Technology and Systems Concepts
3 credits
This course establishes a foundation for the understanding of information systems in organizations. Applications and technologies are studied in relation to organizational objectives. The student studies different types of systems such as MIS, DSS, EIS, and basic applications to a data center environment. The student studies an overview of technology including hardware, software, Internet, e-Commerce, database, and objects.

ORG 203N758
Practical Applications of Accounting
3 credits
This course introduces the students to the principles and concepts of financial accounting. Students will develop a basic understanding of business transactions, balance sheets, and financial statements.
Pre or Co-requisite: CMPT130

CMPT 309L758
Project Management
3 credits
This course discusses the factors necessary for successful project management. Topics include project management concepts, needs identification, the project manager, teams, project organizations, project communications, project planning, scheduling, control, and associated costs. Project management software tools will be an integral part of the course and a major project will be assigned related to a typical data center business application.
Pre or Co-requisite: CMPT130

*These credits can also be used toward the completion of a Bachelor’s degree program or the fulfillment of elective credits.
