

Marist will host a screening of the film **The Ecological Footprint: Accounting for a Small Planet**, introducing the Ecological Footprint and in thirty minutes paints a picture of our current global situation. At the end of the film, join our panel of environmentally concerned professors and students to view and discuss the film, *The Ecological Footprint*. Learn how scientists such as Dr. Mathis Wackernagel calculate our ecological assets, and why a budgetary approach to sustainability offers many paths to the same goal – a quality life.

When?

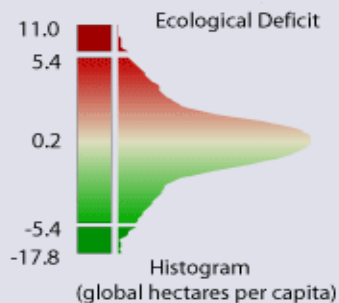

March 31, 2008

7:00 PM

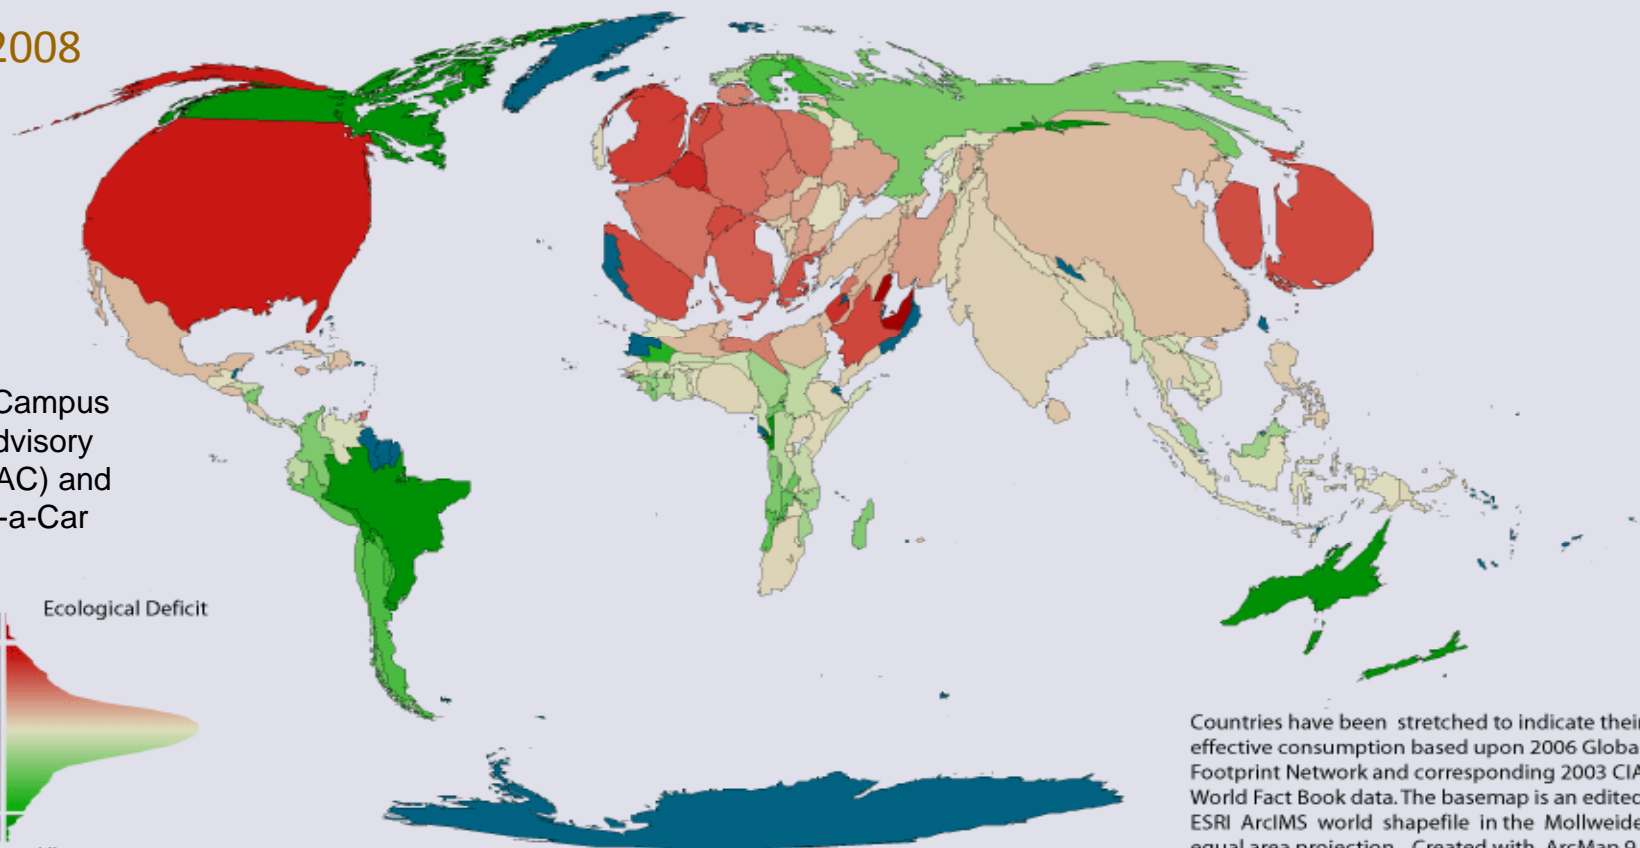

Where?

Performing
Arts Room
(PAR)

Sponsored by: Campus
Sustainability Advisory
Committee (CSAC) and
Enterprise Rent-a-Car

Blue represents insufficient data.

2003 World Consumption Cartogram

<http://pthbb.org/natural/footprint/>

Countries have been stretched to indicate their effective consumption based upon 2006 Global Footprint Network and corresponding 2003 CIA World Fact Book data. The basemap is an edited ESRI ArcIMS world shapefile in the Mollweide equal area projection. Created with ArcMap 9, MAPress 1.3, OpenOffice 2.2 & Perl 5.8
