

# Global Warming Predictions

**Please announce  
to your classes – please attend**

## ***HOW TO HIT "PAYDIRT:" SOIL SCIENCE AND GLOBAL CLIMATE CHANGE***

**Tuesday September 16  
9:30 – 10:45 a.m.  
Dyson 209**

**Please welcome Dr. Peter Groffman**

**Staff scientist at the  
Carey Institute for Ecosystems Studies  
Millbrook, NY**

*Dr. Groffman's research focuses on microbial processes in an ecosystems context. His objectives are to gain insight into 1) the role microorganisms play in ecosystem functions related to nutrient cycling, water and air quality, and soil carbon storage; and 2) environmental regulation of microbes. He shared the 2007 Nobel Prize with Al Gore and other members of the UN Intergovernmental Panel on Climate Change, for his contributions to this path-breaking global research.*

**Co-sponsored by Campus Sustainability Advisory  
Committee, School of Science, School of Manage-  
ment, Economics Department**

**MARIST**
