

December 2022

Dear MATH130 Students,

Welcome to Introduction to Statistics online! The iLearn site will open on December 16<sup>th</sup> at noon. When you log in to the iLearn site for our class you will find the Syllabus and Weekly Schedule under the syllabus tab on the left-hand side of your screen. Please review them as soon as the site opens.

There will be two introductory discussion forum posts on iLearn. The link to them will be in the Lessons tab. Please look them over and start posting as soon you are able.

The majority of your assignments will be in the iLearn site for the course. All the textbook information is included on page 2 of this message. The textbook including the access code is available at the campus bookstore. However, you do not have to have a hardcopy of the textbook unless you prefer it. The homework assignments are all in WileyPlus' online homework management system. You are required to do the homework assignments.

On iLearn, your assignments are set up so that you can see exactly what I expect you to complete each week. You will also find links to any assignments that you will need to complete for each chapter.

This is a rigorous course. Each week we will cover about two chapters in the text. Some weeks have more material than others. Plan to spend a *minimum* of 30 hours a week on the course, between reading the material and completing the homework and chapter summary assignments. Keep in mind that this is the same course, *with the same requirements* as if you had taken it in during a 15-week semester. It is a lot of work.

Instead of tests, you will be required to create and administer a survey to collect data on a topic of your choice. You will then have to write a paper and prepare a slideshow summarizing and interpreting your results.

I've given you a ton of information here. I'm sure you will have questions. I LOVE questions! Whenever you have questions, please send me an e-mail. I promise I will get back to you as soon as possible, usually no more than 24 hours. There is also a Q & A forum in iLearn that you can post questions to!

I look forward to working with you during our Winter 2023 course!

Sincerely,

Joy L. Sebesta

Office Hours: by Appointment via Zoom

The textbook is available in a paperback version, loose leaf binder version or as an e-book entirely online. I strongly suggest the e-book with WileyPLUS access. No matter which version of the textbook you choose, you will need the WileyPLUS access code for homework assignments.
